

Utah Partners FOR HEALTH

Providing Access to Healthcare for Those in Need

www.upfh.org

Message from the Chair Board

The year 2014 was a year of growth as we established our Federally Qualified Health Center in Midvale, the Mid-Valley Health Clinic. We went from a relatively small company of three employees to a company that now employs twenty-five. The work has been intensive, but we are overjoyed to fulfill our mission: To provide compassionate, comprehensive, quality care to empower underserved individuals, families, and communities in a patient centered medical home.

The year had many celebrations: We added a mobile eye clinic that travels along with our mobile medical clinic providing free eye exams to Title 1 students and their families. Students also get a free pair of prescription lenses and the incredible thanks we get from students, parents and teachers is very heart warming. We celebrated Utah Partners for Health providing over 80,000 individuals access

to healthcare services. The mobile medical clinic held over 100 events, provided over 3,000 patient visits, and incorporated electronic medical records to improve patient care.

Tami Eckstein

The Mid-Valley Health, a Federally Qualified Health Center, opened to serve the community six days a week with extended hours two nights a week. The Mid-Valley Health Clinic provides primary health care services to all individuals regardless of their insurance status or ability to pay. In 2014, the clinic has already served over 4,000 individuals fulfilling

a great need for Midvale city and the surrounding communities.

As we look forward to 2015 and beyond our goal is to continue to expand services and improve access to healthcare for the underserved. We have already achieved accreditation as an ambulatory health center and certified as a Patient Centered Medical Home by the Joint Commission. This is an important recognition that emphasizes our concern over patient safety and effective care management. Additionally, our plan is to fully integrate our medical services with behavioral health into a single health system treating the whole person. Our goal is The Triple Aim of Healthcare: To improve the health outcomes of our population, to improve the individual patient experience, and to reduce costs in the healthcare system. As we move forward the Utah Partners for Health Board of Directors will continue to look

Our mission is to provide compassionate, comprehensive, quality care to empower underserved individuals, families, and communities in a patient centered medical home.

forward to passionately fill gaps in Utah's healthcare system.

I want to extend the Utah Partners for Health Board of Director's sincere appreciation to Kurt Micka and all of the staff; your dedication, and positive attitudes are a daily reminder to all of us that change can happen, starting with one individual daily choosing to do the right thing. Mother Teresa shared "Love cannot remain by itself — it has no meaning. Love has to be put into action and that action is service."

Model 1 Partnering Clinics

We partner with healthcare providers who donate an average of 68% of their customary billing to our patients. This model allows us to leverage our donations to over \$6.63 in healthcare provided for every \$1.00 donated to direct services. Patients make a small co-payment (as if they had insurance), paying an average of 17% of the total healthcare bill. UPFH funds the remaining 15%. This is a viable and inexpensive option for patients needing primary care services, and often prevents unnecessary emergency room visits. UPFH works with over 100 health care professionals who partner with us in serving the underserved.

Model 2 Mobile Clinics

Our Mobile Clinic Program reaches into communities that experience cultural and transportation barriers, in addition to being low-income and lacking insurance. Patients receive free exams for acute, chronic, or mental health illnesses. Children and adults receive well checks, and students can receive a sports physical. Patients can be checked for diabetes, hypertension, urinary tract infections, strep throat, anemia, pregnancy, and receive nebulizer treatments for respiratory infections and asthma. Mobile Clinic clients typically would have used the emergency room or not sought care due to cost, transportation, or lack of understanding of the healthcare system. In 2015, we will be expanding our mobile eye exams and access in a mobile vision trailer setting to students and families in Title 1 schools.

Model 3 Mid-Valley Health Clinic

The Mid-Valley Health Clinic (MVHC), located in Midvale, UT., is a Federally Qualified Health Center providing primary healthcare services for all patients' regardless of their ability to pay. We offer a discounted sliding fee schedule for patients 200% and below of the Federal Poverty Level. The clinic is open six days a week with extended hours on Tuesday's and Thursdays to meet the needs of the surrounding community.

Jonathan's Story

Jonathan had been struggling with his eye sight for a long time. But going through all of the steps to get glasses are often insurmountable barriers to families whose parents work multiple jobs, don't have insurance, or transportation. The academic repercussions of not being able to see in school are obvious. Over 20% of school-aged children in this country have problems seeing. Title 1 students are two to three times more likely than non-Title 1 students to have unde-

tected or untreated vision problems. In Jonathan's case, he was so excited to be able to go to the optometrist while at school that he skipped recess to go to the clinic. "Before I got my glasses," he says, "I couldn't see the board even though I sit close up. Now that I have them, I can see way better. When I didn't have my glasses, I could never see things that my mom was showing me, but now I can see everything. And things aren't blurry anymore. I don't have to go close up to the book to read it."

Management Analysis

Utah Partners for Health is proud to announce the results of our 2014 Independent Auditor's report by Shaw & Company. "In our opinion, the financial statements present fairly, in all material respects, the financial position of UPFH as of December 31, 2014, and the changes in its net assets and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America." Shaw and Co.

We'd like to thank the staff at UPFH for receiving a perfect audit and maintaining high accountability.

UPFH raised \$1,833,128 with the continued generosity of our donors and supporters. In-kind donations from our partner healthcare professionals totaled \$407,049 and represented 66% of total healthcare access provided. General Grant revenue increased 694,328 due to the Federal grant for MVHC. Our total operating budget was \$1,530,029.

UPFH is excited to have provided access to over 10,339 patient encounters in need of healthcare in 2014. Since 2003

UPFH 2014 Independent Auditor's Report: Revenue & Expenses

over 70,000 low-income individuals have now received care. We were able to leverage \$6.63 in healthcare services for every \$1.00 donated in 2014.

We are dedicated to serving patients throughout Salt Lake and Tooele Counties, and plan to continue to expand our services and funding base

in the many years to come. We look forward to our own clinic, the Mid-Valley Health Clinic, the Mobile Clinic, and our

In-Clinic programs to continue to fill gaps in Utah's healthcare system in 2014.
